## **Radiesse – effective in many areas**

### **1 Eyebrow**

Radiesse can lift your eyebrows to make your eyes appear open and fresh.

### **2 Temple**

Hollow temples can be filled out to give your face a fuller appearance.

### **3 Cheekbone**

Volume in the cheekbone strengthens the 'V' shape of the face and shapes a youthful appearance.

### **4 Earlobe**

Radiesse can help restore the fullness and smoothness of the earlobes.

### **5 Nasolabial folds**

The folds between the nose and corner of the mouth, also known as the 'laugh lines', are often the most noticeable lines. They can be filled out easily, giving you a fresher and younger look immediately.

### **6 Cheek / hollow cheek**

With the V Effect, lost volume in sunken cheeks can be replaced effectively.

### **7 Marionette lines**

These are the lines that go from the corners of the mouth down to the jaw. With the marionette lines filled in by Radiesse, you will gain a cheerful expression.

### **8 Lower jawline**

Defined contours on the lower jaw help to maintain the youthful 'V'.

### **9 Bridge of the nose**

Nasal imperfections can be reshaped and smoothed out with Radiesse without resorting to surgery.

### **10 Chin fold**

A sunken chin fold can be filled in with Radiesse defining the base of the 'V'.

### **11 Chin**

Radiesse helps to achieve a natural expression, defining the jaw line.

### **12 Back of the hand**

Veins and bones are more clearly visible with age. Retain a youthful appearance by plumping the back of the hands.

# DERMAL FILLERS

# INTRODUCING RESTYLANE® SKINCARE

An unique range of Restylane Skincare products—the result of extensive research, providing you with beautiful skin.

**Restylane Skincare Ultimate Gift Set £149 - save £60**

The secret to beautiful skin is balanced hydration and a healthy and protective skin barrier. Restylane Skincare combines these two qualities in an innovative skincare range.

Whereas Restylane dermal filler treatments create volume, definition and hydration from within, Restylane Skincare protects, hydrates and nourishes the outer and upper layers of your skin to provide a healthy, glowing, radiance.

The Restylane Skincare products have been produced to improve skin health and function using a combination of proven technologies and scientifically proven active ingredients.

Restylane Skincare is highly biocompatible with the natural structure of the skin. The range comprises six different skincare products:

- **Day Cream**
- **Night Cream**
- **Night Serum**
- **Recover Cream**
- **Hand Cream**
- **Facial Cleanser**

All the products, with the exception of the cleanser, contain a unique form of stabilized hyaluronic acid produced by patented, and proven, NASHATM technology, which has been embedded in a very special lipid network. This unique combination provides your skin with superb protection and added hydration leaving it looking radiant and feeling silky smooth.
